

Project: Powerclick

Professor: Mehdi Peiravi

Class: CPSC362-15

Team Name: CZS

Team Member: Sang Doan

Chen Yu

Zacham Pham

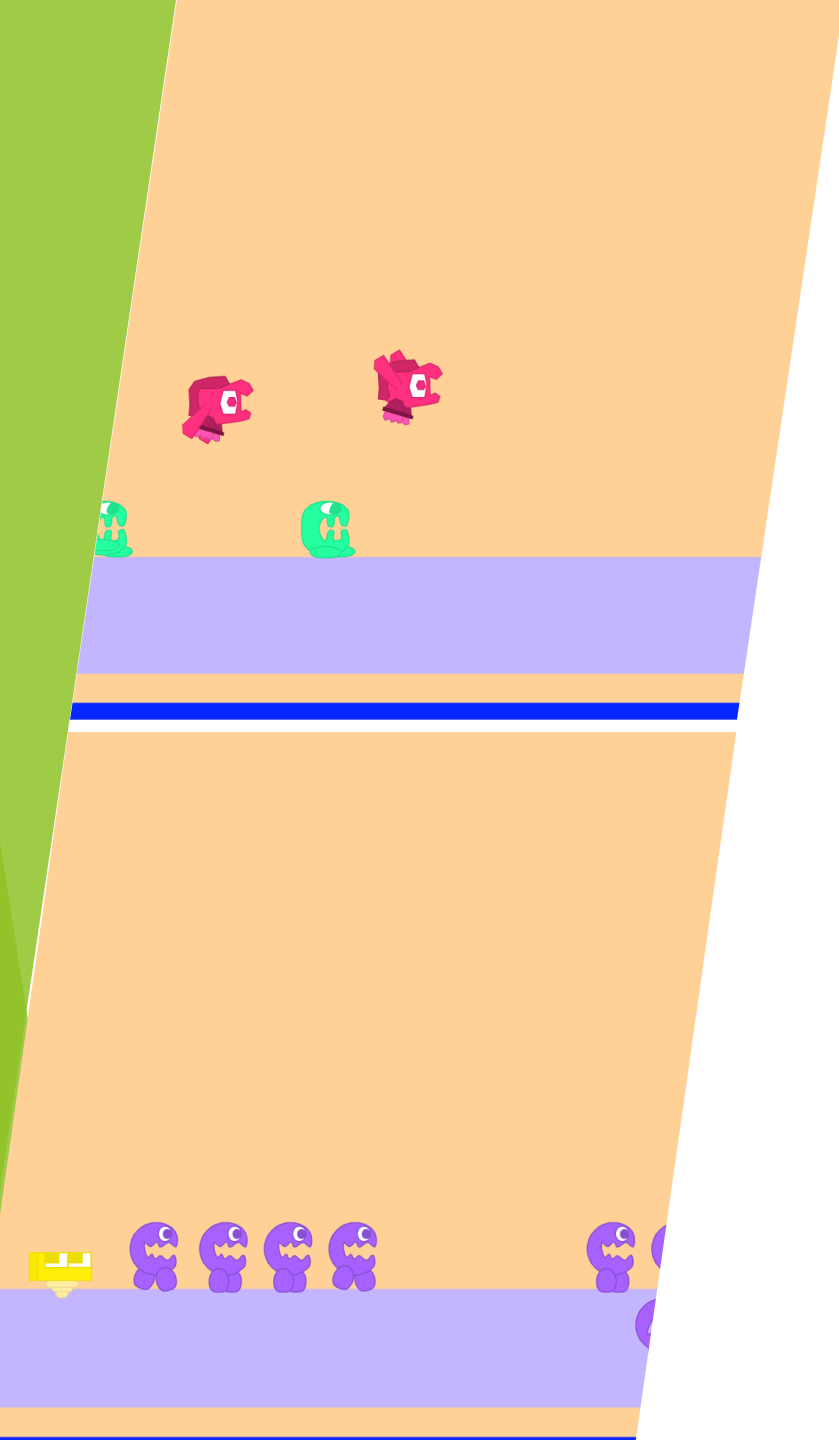

What is it?

A clicker game where you have to keep out random enemies from walking into your house. Use your mouse to do so!

Project Information

Description: This project is like a more "defintive" version of the original game, meaning the screenshots above are simply beta screenshots. It will be programmed in more advanced languages, compared to the original having used Scratch.

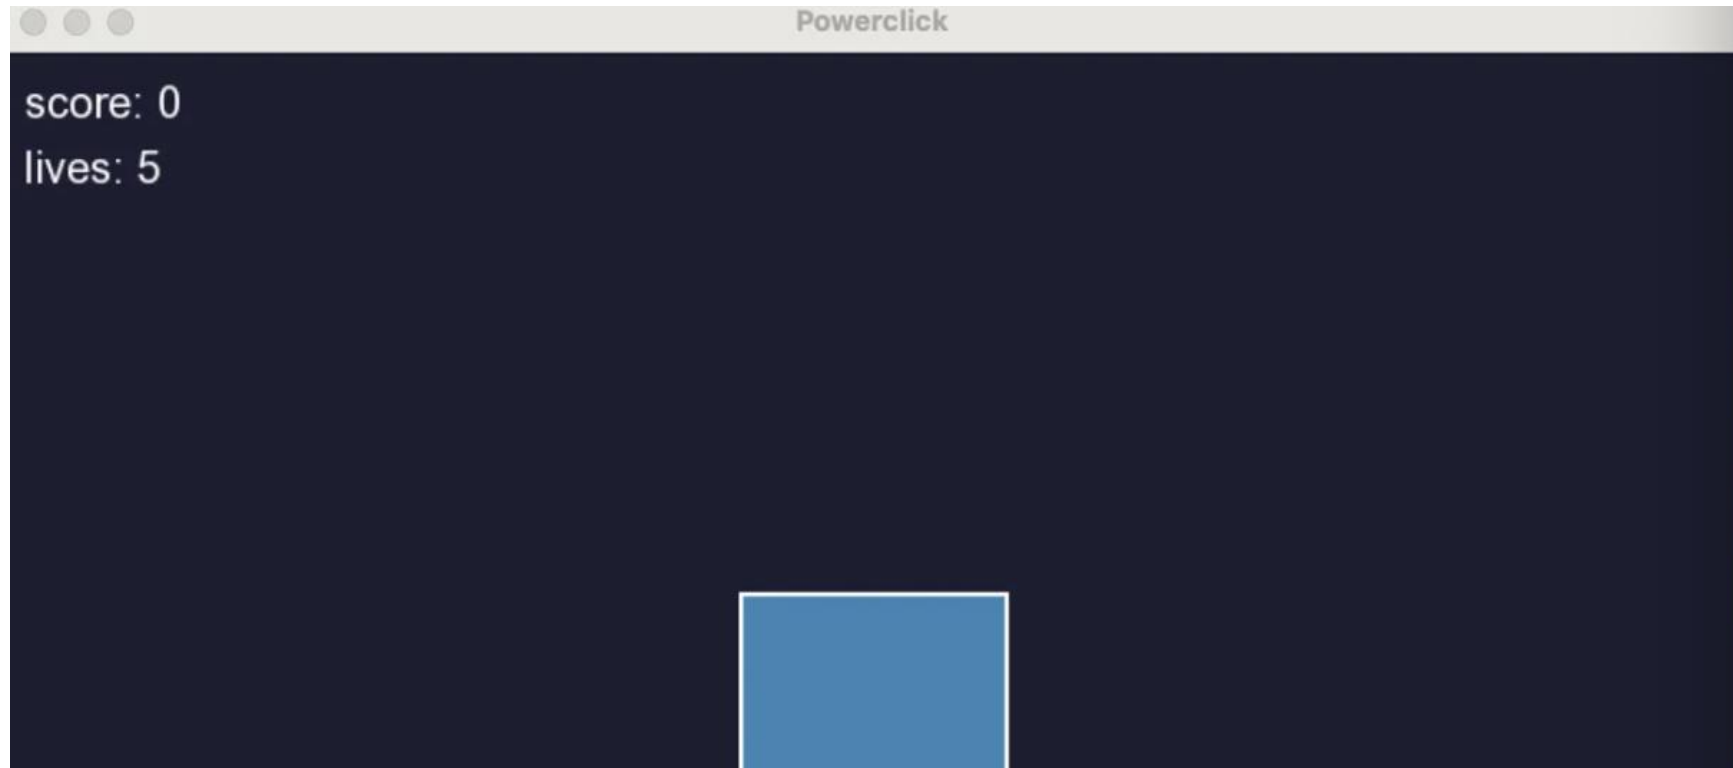

Other information

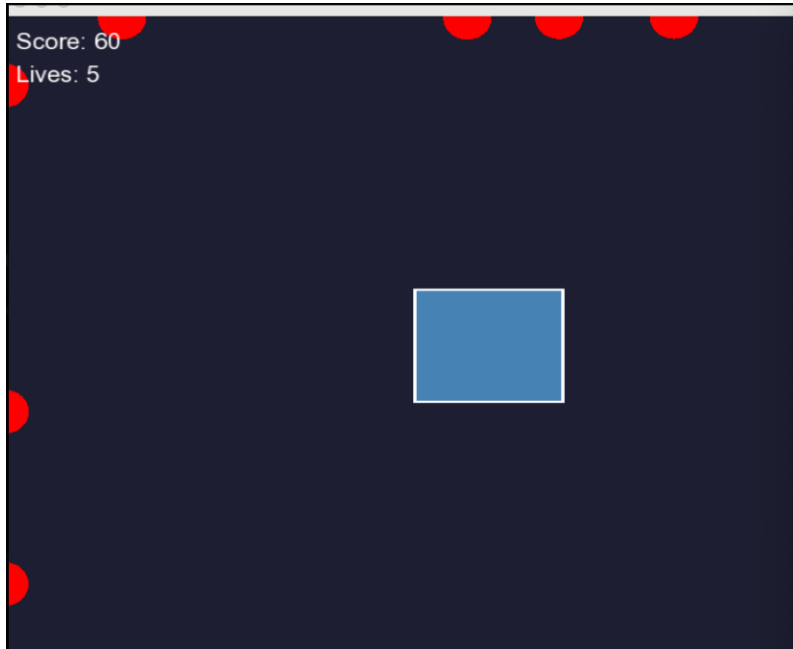

Language: C++, Python, HTML

IDE: VScode

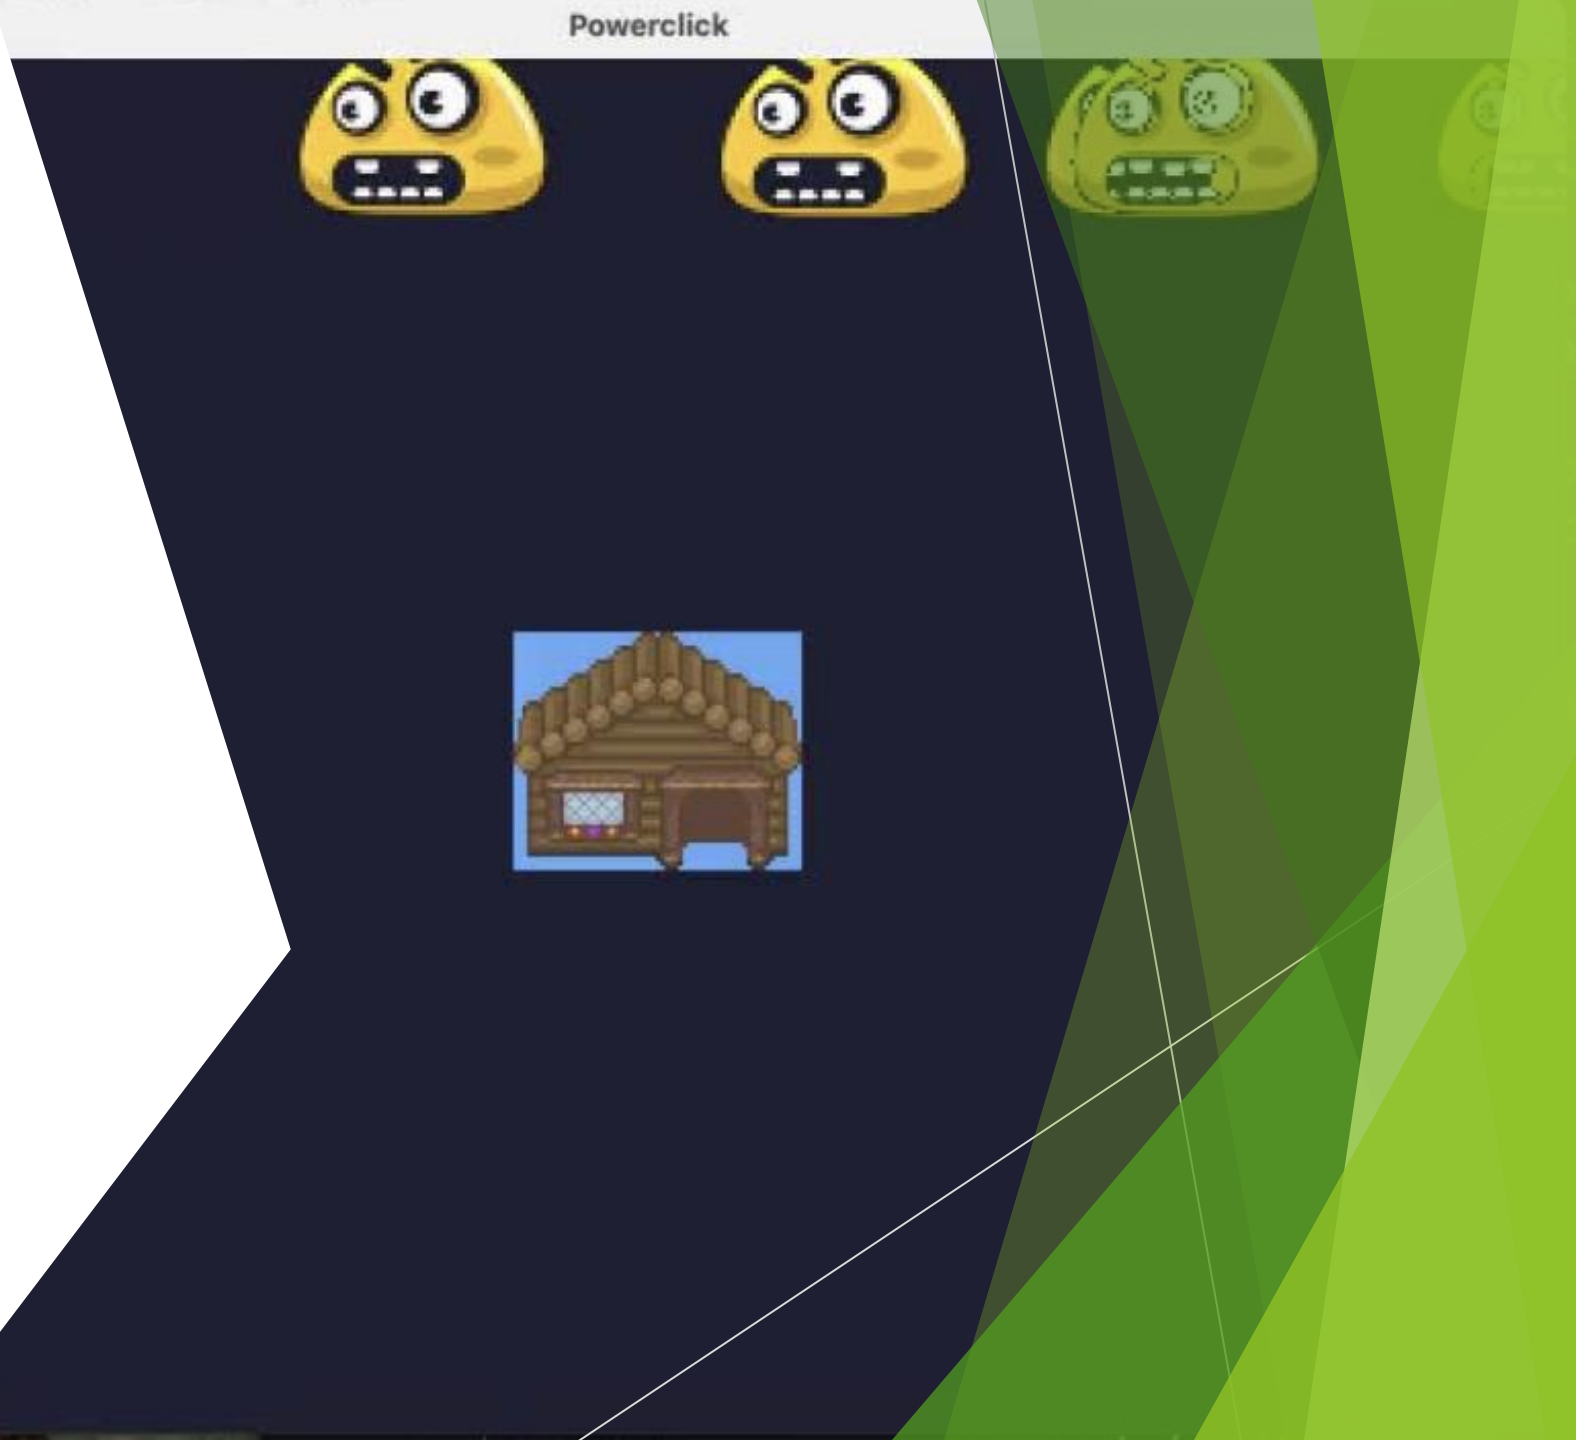

Stage 1: Core of the Powerclicker Game

Stage 2: Adjusted House and Viewable Enemies

Stage 3: Detailed Design for Enemies and Home Base.

In the next weeks, we will achieve:

Add background music

Improve enemy behavior as they get closer to your house

Make the game more cute and interesting
